PlanIt

Crypto2.0WeLoveAds

Intro/Summary

- PlanIt
    - A Scheduling app to help better your time management skills
    - Uses simple designs to make it easier to scroll through events
    - Has many different features such as light/dark mode, event creating / editing, a search function, and etc.

Work Performed

- Project Planning
- Designing our screens
- Implementing a database for events
- Redesigning our screens
- Timed reminders based on location
- Adding options

What went well

- Teamwork
- Efficient group meetings
- Unifying the design
- Dark Mode

Challenges / Resolutions

- Events not displaying
  - App Inspection
  - Event_items.xml
- Accent Colors
  - Scrapped / Spent time elsewhere
- Location Notifications
  - Average travel speed

Future Work

- Google's Distance API for traffic data
- Accent Colors
- Calendar Coloring

Conclusion

- This Project was fun and challenging

- While we didn't get to implement all of the things we wanted we are happy that we at least got the necessities finished.

- NOW LETS SEE THE PRODUCT!
